press release

Amsterdam - November 2005. This week **Basserk records** released its first 12" and celebrates the beginning of something new and exciting. Basserk is the fresh new electronic music label from Amsterdam. Founded by Tom Schivez (Mex), Peerte Trunt (S) and Rufus Baxendale (UK), whose goal is to create a label for music in different electronic styles. **Original, innovative, energetic** or just super fat music from talented producers and bands.

Basserk has developed a strong underground network that's powerful and motivated to survive in this competitive market. Although Basserk is based in Amsterdam, it also operates outside the Netherlands. We'll go all over the planet and internet to make sure that everybody has got the chance to get our wicked Basserk records.

Electro, pistol pop, breakbeat, acid, rock&roll, jungle, discopunk or whatever the name of the genre is, Basserk releases it, but only if it's great. It's all about **energy, power and quality**. Styles of music these days are growing more and more into each other, crossovers are being made in every way and people are open for different styles of music. For example, why are 2manydjs so popular at the moment?

Because they mix all possible styles into 1 great set. People love the combination of energy and great music being mixed. You'll never get bored cause you don't know what's coming. It's the power of **unexpected combinations**. The concept of Basserk is based on the same principle. Of course we're not going to release just anything freaky or wild, but trust our taste. Anyway, give us a bit of time and you will see.

Basserk's first release is a 4 track 12" by **3-1**. This band has already released 4 cds in the last 4 years and played over 120 live gigs in the Netherlands, Germany, France, Spain, Poland and Belgium. The 12" is called "**don't destroy**" and contains 4 top notch tracks. It's **electropunk/pistolpop** at its best. They've already got a great reputation for crazy and wild live shows: the combination of their raw electro, videos and a wild performance makes people go insane. Now it's captured on a record, 4 powerful tracks in a beautiful sleeve (designed by 310k). A must for all djs and vinyl lovers.

Keep an eye on Basserk, cause there are loads of good things coming.

Cheers, the Basserk team
